**DETAILED ACTION**

***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

|

***Information Disclosure Statement***

2. The information disclosure statement (IDS) submitted on 05 January 2007 and 14 December 2007 has been considered by the examiner. However, in the 14 December 2007 IDS, the reference to US 2000-286296 is incorrect and has not been considered.

***Drawings***

3. Figures 12-18 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Specification***

4. The disclosure is objected to because of the following informalities: The application format does not follow standard US format and should be changed to include, inter alia, sections such as background of the invention, field of invention, description of related art, brief summary, etc. See MPEP 608.01.

In paragraphs 10-26, reference to prior art Japanese patents should be amended and put into proper format.

In paragraphs 27-52, reference to specific claims must be deleted.

In paragraphs 58-76, figures 3A & 3B, 5A & 5B, 6A & 6B etc. must be specifically referred to and described. Appropriate correction is required.

***Claim Objections***

5. Claims 1-6 are objected to because of the following informalities: In claim 1, recitation “by making elastically in contact with the power supply land” is not idiomatic. Appropriate correction is required.

In claims 2-5, “as for a positional relationship” is not idiomatic.

In claim 6, “an ring-like” should be —a ring-like—.

***Allowable Subject Matter***

6. Claims 1-13 are allowed pending correction of errors noted above. The prior art does not teach the claimed vibration motor including, inter alia, “each of a bending point and an action point of a movable portion of the power supply terminal movable in the direction in which the

power supply terminal contacts the power supply land is arranged in a plane that includes a center of gravity of vibrational motion of the motor for generating vibration and is almost perpendicular to a rotating axis of the weight (claim 1).

***Conclusion***

7. This application is in condition for allowance except for the formal matters noted above. Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to BURTON MULLINS whose telephone number is (571)272-2029. The examiner can normally be reached on 9-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Darren Schuberg can be reached on (571)272-2044. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
